## CIVIL SERVICE CHANCES. The Commission Prepares a Statement Answering Many Questions.

worth reading as any other department of the

If there is any conceivable style of question that an applicant for a government position answer everything would be too much for any one to attempt to do, so the commission has wish to enter the classified civil service of the United States with information as to the teresting matter on both subjects. It begins with an abbreviated edition of the rules that govern the commission's methods and work under the several heads-applicants, times and places of examinations, examinations, and re-

RE-EXAMINATIONS. Under the latter heading this book of in-

structions has the following: Persons failing to pass an examination may, after six months from their failure. file new applications and be re-examined. No person who has passed an examination shall, while eligible on the register supplied by such ex-

amination, be re-examined.

Re-examinations other than as specified above can be had only by permission of the commission; and such permission will be given only in exceptional cases where the applicant was incapable of doing himself justice on account of sickness or other good cause, and then only upon affidavit of the facts,

When may an appointment be expected? is the question that is certain to be of the most interest to an applicant who has taken an examination and feels satisfied that he has done himself credit. This very natural question the commission's hand-book answers in the following way:

The name of each applicant who passed the clerk or copyist examination at the required grade will be entered upon the register of the order of his grade. Applicants who have passed the clerk examination take their chance place, as must those who have passed the copyist examination take the chance of getting \$900, or only one of the \$840, \$720, or even

be filled from the clerk or copyist registers the commission certifies from the eligible register appointments in proportion to its population the names of the three persons graded highest of the sex and grade called for, and from the three a selection is made. The applicant must remember that the examination, if it shows the requisite capacity, will only entitle him to be placed on the register of those eligible for apcointment, and to be certified, in his turn, to (N.Y). the appointing officer when a vacancy shall oc-cur, and when his state is reached in the order the bill, which resulted in 135 years to 119 nays.

The time of examination is not considered in the same department. Persons honorably discharged from the military or naval service of the United States by reason of disability resulting from wounds or sickness incurred in the line of duty are given preference in certifica-

Each applicant by his examination decides his own standing and hence his own chances of an early appointment. Most of the examinations are common for all the places in each of Rocky mountains, except in the extreme souththe departments at Washington for which they ern portion of the gulf states, in Florida and are appropriate, and an applicant cannot know to which department his name may be certified. Each name remains eligible on the clerk and copyist registers one year from the date of its entry thereon after the marking is completed unless the person is sooner appointed, and on the special and supplementary registers two years.

CHANCES OF APPOINTMENT.

showing the number of those who took clerical examinations from the various states up to the 15th of May, 1890, with a list of those who had wheat poor; three southern counties report inreceived appointments during the year ending on that date. Out of \$18 examined only seventyfive received the desired positions. In com-menting on this schedule the commissioners Atlantic states conditions have been favorable have the following to say:

amined and the number appointed shows the keenness of the competition on these registers and makes it evident that none of those applying have any chance unless they pass at an exceptionally high standard. Of the 689 men who passed the clerk examination during the year ending June 36, 1889, only 65 were appointed. The proportion of appointments, 30 passed and 19 were appointed. On the other hand, from Indiana 73 passed and none were appointed; from Virginia 18 passed and none were appointed; from Illinois 45 passed and were appointed; from Ohio 95 passed and none were appointed; from Maryland 24 passed and none were appointed. From these five states 255 men passed the clerk examination and none were appointed. No appointments have been made of men from the clerk and copyist registers of Maryland and Virginia since registers of Maryland and applicant 1884, and the chances of any applicant from these states are very small. Since July 1, 1887, the lowest standing reached for an ap-pointment under the clerk examination from indiana, Ohio, Pennsylvania and Illinois was Ss. These figures are partly explained by the need of making an apportionment which has been equitably maintained with respect to most of the states, although, of course, not with mathematical exactness. A few of the states and nearly all the territories have received relatively an excessive share of appointment as compared with the other states. This is notathe case with respect to Maryland, Virginia and the states and territories indicated in italics in the table and the District of Columbia. and has resulted from a necessity of examining and certifying for appointment to places requiring special or technical knowledge or skill such persons as offered themselves after due public notice, without regard to their places of Such persons have been found relatively in

larger numbers in Maryland, Virginia, Indiana, Ohio, Illinois and the District of Columbia than elsewhere. The states which in the above table appear to have had no clerk appoint-ments or only a small share have supplied persons from the special and supplementary registers in great numbers and in this way have secured their full share, and in some cases more than their full share, of all the appointments made. These same states also send large numbers into the clerk and copyist examinations, appointments under which cannot be made because of the unavoidable confinement

"INFLUENCE." There is no need of seeking the aid of any prominent or presumably influential person to secure an application paper or an examination. No recommendation or certificate, besides those provided for in the official blanks, will be received or can be of any use in securing an examination or a certification for an apan examination or a certification for an appointment. Time spent in attempts to change strengthening.—Adv.

the order of certification will be lost. Neither the commission nor any examiner can help any one to get an appointment and they have noth-ing to do with the choice by the appointing officer from those certified.

Every appointment is made for a probationary period of six months, at the full salary attached to the position, at the end of which time, if the conduct and capacity of the person ap-pointed have been found satisfactory, the appointment is made absolute. An eligible who has made a false statement

in his application, or who has been guilty of fraud or deceit in any matter connected with his application or examination, or who has been guilty of a crime or of infamous or notoriously disgraceful conduct, may be excluded from certification.

The authority and duty of removal are left andisturbed by the civil service act and rules, except that a removal cannot legally be made because a person in the service has refused to be coerced in his political action, or has refused to contribute money for political pur-poses, or has refused to render political service. In making any reduction of force in the could ask of the civil service commission and fails to ask it has not yet been found out. THE EVENING STAR is offered to the public, in good faith and with confidence, as THE BEST LOCAL ADVERTISING MEDIUM IN THE UNITED STATES. In point of fact, it may be truthfully said that it is without an equal in this respect any where in the world, These averments are borne out by the figures given below, which are compiled from the

papers published in the city added to-3. The Star has a larger and fuller circulation in the city where printed in proportion to reading and purchase

Av'ge.22,123 23,682 25,484 27,082 30,090 Increase ...... 1,559 1,803 1,598 3,008 Of this remarkable average aggregate of 30.090 copies circulated daily, no more than 1,102 copies are sent out of the city by mail, and 1,106 go to suburban places, by express, railway trains, etc., leaving as a net circulation in the city proper the PHENOMENAL PRO-PORTION of 92% PER CENT, or AN AGGRE-GATE of 27,882 copies! Of this number, 21,142 were delivered daily by regular carriers at the homes of permanent subscribers.

The remaining 6,740 copies represent the sales over the office counter, at the news stands, and by newsboys. But of this latter number a very large proportion is supplied regularly to permanent residents of the city living in lodgings, &c. (not householders), so that its whole circula tion may be literally said to be in the family circle. While its aggregate circulation therefore gives THE STAR a distinctive and enviable position in modern journalism, the fullness of its home circulation, the extent to which it is relied upon by members of the household, and particularly by the purchasing portion of the community, are the marked characteristics of the paper, to which no other daily journal now

published can furnish a parallel. This is no idle boast on the part of the paper. It is a well established fact, demonstrated to the full satisfaction of the sagacious and enter-RETURNS FROM THE MONEY PAID OUT FOR ADVERTISING. This is proven by the growth of The STAR's advertising patronage. Nothing can more surely illustrate the esteem in which any article is held by the public than a constantly increasing demand for it-day by day, week by week, month by month, and year by year,-in the face of adverse claims and pretentious competition. The figures following tel! the story on this point:

1888 is even more striking. The average daily space filled by advertisements in 1888 was 25.10 columns, or 7779 columns for the year; whereas for the year 1889 the daily average was 29.75 columns, or 9223 columns in the aggregate, being a total gain over the previous year of 1444 columns! And this, it must be remembered, consisted exclusively of the ordinary everyday business advertising, nothing in the way of tax sales poll lists election ret etc., such as occasionally swell the business of political organs, being included in its patron-

In conclusion, it is only necessary to say that, in proportion to the extent and high character of its circulation, THE STAR's advertising rates take rank with the very lowest in the country, and to add, finally, that every statement hereis made can be abundantly verified. THE CIB-CULATION OF THE PAPER IS SWORN TO: ITS PRESS AND CIRCULATION ROOMS ARE OPEN TO THE PUBLIC, AND ITS BOOKS MAY BE INSPECTED BY ANY ONE HAVING AN INTEREST IN THEIR EXAMINATION.
